How are personal research activities reflected in teaching activities?	Integrating teachers' personal research activities into teaching makes lessons more interesting, meaningful and useful. This approach contributes to the development of students' important skills such as critical thinking, analytical analysis and professional behavior and prepares them for both scientific and practical work. It also helps to form language and communicative competence and implement them in professional activities. In also personal research allows students to be presented with interesting and relevant topics, which increases their enthusiasm for scientific activity.
